## SUMMARY

---

Frontend Developer with hands-on experience building responsive, scalable web applications using React.js, TypeScript, and modern JavaScript (ES6+). Proficient in REST API integration, Redux state management, and performance optimization with a focus on reusable component architecture and clean, maintainable code.

## TECHNICAL SKILLS

---

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frameworks & Libraries:** React.js, Next.js, Redux, Tailwind CSS, Axios

**Tools & Practices:** Git, Vite, REST API Integration, Responsive Design, Accessibility (a11y), Cross-Browser Compatibility, Agile/Scrum, Component-Based Architecture

## WORK EXPERIENCE

---

### Web Developer Intern

Oct 2025 – Jan 2026

*Floretta India*

*Uttarkhand*

- Engineered and maintained responsive web pages using React.js, HTML5, CSS3, and JavaScript, ensuring pixel-perfect UI across multiple browsers and devices.
- Architected reusable, modular UI component library that reduced code duplication and improved feature delivery speed within an Agile team.
- Optimized component rendering and applied performance best practices, improving page load responsiveness for end users.
- Collaborated with developers via Git-based version control, managing feature branches, code reviews, and pull requests in a team environment.

## PROJECTS

---

### Luke Fashion | *React.js, TypeScript, Redux, Tailwind CSS, Vite*

- Built a fully responsive e-commerce frontend with reusable product card, cart, and checkout components following mobile-first design principles.
- Implemented global state management using Redux and React Hooks, enabling seamless cart and user session handling across the application.
- Leveraged TypeScript for type-safe components and props, reducing runtime errors and improving code maintainability.

### Application Tracker | *React.js, JavaScript*

- Developed a CRUD-based job application dashboard enabling users to add, update, filter, and delete job entries with real-time UI feedback.
- Designed scalable component architecture with clear separation of concerns, making the codebase easy to extend with new tracking features.

### Weather App | *React.js, JavaScript, REST API*

- Integrated OpenWeatherMap REST API using Axios and async/await to fetch and display real-time weather data based on user location.
- Utilized the browser Geolocation API and managed asynchronous state with React Hooks, delivering a seamless, accessible (a11y), location-aware user experience.

## EDUCATION

---

### Alagappa University

2023 – 2025

*Master of Business Administration*

### Hindustan College of Arts and Science

2020 – 2023

*Bachelor of Science, Computer Science*

## CERTIFICATIONS

---

- **Udemy:** Ultimate React Course
- **Simplilearn:** JavaScript Fundamentals
- **Simplilearn:** Git Training
